Onboarding Automation Flow

From first survey response to active Return Hub — automated, scored, and human-approved.

Returna — Internal
February 2026
ONE-PAGER

STEP 1
Typeform Survey
Partner fills self-assessment: capabilities, certs, capacity, geography

STEP 2
Database Import
Auto-import into partner database, normalize data, flag gaps

STEP 3
Auto-Scoring
Point-based scoring engine suggests tier: Cat 1 / 2 / 3

STEP 4
Manual Review
Team reviews, adjusts tier if needed, approves or requests more info

STEP 5
Activate Hub
Partner goes live, volume routing begins, ERP access granted

SURVEY COLLECTS

- → Company info & contact details
- → Countries served & depot locations
- → ISO 27001 / ISO 14001 / WEEE status
- → Data erasure tools & methods
- → ITAD capabilities (intake → disposition)
- → Repair & refurb level (TRC-aligned)
- → Logistics & box program readiness
- → Monthly processing capacity
- → Resale channels & downstream control
- → Motivation for joining Returna

SCORING ENGINE

- → **Certifications** — ISO 27001, 14001, WEEE weighted highest
- → **Capabilities** — erasure, diagnostics, refurb scored per level
- → **Capacity** — monthly throughput (devices/month)
- → **Geography** — coverage in priority regions scores higher
- → **Experience** — years active, enterprise references
- → **Tech readiness** — API/integration capability
- → Score maps to suggested tier (Cat 1/2/3)

ONCE ACTIVE

- → Tier determines eligible project types
- → Volume routing based on geography + tier
- → Performance KPIs monitored from day 1
- → SLA breaches trigger throttle/reroute
- → Quarterly review cycles
- → Tier upgrades via TRC training + re-assessment
- → Full ERP access (warehouse module)
- → 90% execution fee + 30% resale proceeds

→ Below minimum threshold → flagged for review

✅ NON-NEGOTIABLE REQUIREMENTS (ALL TIERS)

- ✓ ISO 27001 for data-bearing assets
- ✓ Certified data erasure tooling
- ✓ ISO 14001 + WEEE for recycling
- ✓ Platform-enforced evidence & chain-of-custody
- ✓ Erasure before any other outcome
- ✓ Accept Returna's tier definitions
- ✓ Accept performance-based routing

📍 CURRENT STATUS

- **Typeform survey** — live
- **Tier system** — defined (3 categories)
- **Non-negotiables** — finalized
- **Database integration** — next priority
- **Scoring algorithm** — to be defined
- **Auto-routing logic** — pending
- **Partner dashboard** — pending

🔧 For Christian — Technical Requirements

`Typeform webhook` → partner database (new table/collection) → scoring engine (point-based, configurable weights) → tier suggestion stored on partner profile → admin review UI (approve / adjust / request info) → on approval: activate partner in routing engine, provision ERP access, send welcome email.
